

SECURE EXECUTIVE CONSOLE

When secure collection containers are easy to access, confidential information is less likely to end up in the waste bin. The Defender Ergo Duraflex blends into any office environment and helps ensure that confidential documents are shredded.

The self closing lock with metal striker and anti-pry device set the standard for console security. Designed with longevity in mind, the Ergo Duraflex features pin and dowel construction instead of glue, which will break down over time. Compatible with both the All-in-One bag, and the Ergonomic Rigid Insert, the Ergo Duraflex has the flexibility for every job.
