

65 GALLON SECURE COLLECTION CART

With a 65 gallon capacity, the Defender 65 is the perfect mix of capacity and mobility. Available in both a North American and European body style, and with a selection of different lid options available, the Defender 65 is up to any task. For carts that are moved frequently, or typically have full loads, the Defender Max upgrade allows one operator to easily move two full carts around the facility.

Securely managing physical information throughout its life cycle is key to ensuring that it is destroyed responsibly. Without taking the necessary precautions to protect paper documents there is an increased level of vulnerability and chance of theft. The Defender is like no other cart in the document destruction industry!
