

HIGH CAPACITY COLLECTION CART

The Defender High Capacity has a 175 gal capacity, ensuring that there is a Defender large enough to fit your needs. Despite its size and load capacities the Defender HC is still easy to move around your facility. With eight inch caster wheels and a 31" width, the cart can be easily maneuvered in any direction to fit into the tightest spaces and through most doorways. Two of the caster wheels feature foot brakes to ensure the cart remains stationary even when positioned on an incline. These features make the Defender HC ideal for large facilities and institutions needing to move large amounts of material.
